## Options

- The Tau KX139 Ta'unar Supremacy Armour may exchange either of its tri-axis ion cannon for a fusion eradicator for Free.

### Vigilance Defence System

The vigilance defence system comprises two smart missile systems and two twin-linked burst cannon which may be fired normally. In addition, these weapons can be used to make Overwatch attacks at BS2 contrary to the usual rules for Gargantuan Creatures.

### Barrier Shield Generator

The barrier shield provides a 5+ Invulnerable save, increasing to a 4+ save against Shooting attacks. When a model with a barrier shield is struck by a Destroyer attack and a 'Deathblow' result occurs, the amount of wounds inflicted is halved but the shield stops working until the start of the controlling player's next turn.
